Re: Remote Teaching and Learning

Dear Parents and Guardians,

As you are aware the government has extended the school holiday to reopen schools on Jan 11th. However, it is expected that school will move to remote learning for a number of weeks this month and an announcement is expected very shortly to confirm this.

Our teachers will be in touch through Seesaw with all children to commence remote learning from next Monday January 11th.

Seesaw is firmly embedded as an online learning platform in our school. We began using this platform in March 2020 during the first school closure and we have been assigning school work since the beginning of the school term in September last so that children and parents are very familiar with the app.

Should you have any difficulties logging in or if you have lost your Seesaw code please WhatsApp the school phone 085 2681685 and let us know what codes you need. We will send a picture of the QR access code for your child by WhatsApp. If you have not set up WhatsApp on your smartphone please do so asap. There is no charge for the app.

Children will be assigned to either a class teacher or support teacher attached to the class. During the period of school closure and remote teaching and learning, this teacher will communicate with your child during school hours.

We are very much aware of the difficulties that remote teaching and learning places on all families. A daily routine where children engage in learning, physical activity and social communication within the home will support pupil and family wellbeing.

Ms Sheehan our SCP staff member 087 9672462 and Ms Carroll our Home School Liaison Coordinator 087 6461836 will be available and assisting families during this time also as always.

Kind Regards,

Hugh Connolly

Principal
